

INTRODUCING

Kaspersky Small Office Security
New for 2014!

KASPERSKY SMALL OFFICE SECURITY

KEY FEATURES:

- Centrally managed protection and controls
- Cloud-assisted, real-time protection from cyberthreats
- **Safe Money** security to protect online financial transactions
- Controls to manage employee web surfing and application use
- Android smartphone and tablet security
- Encryption-based data protection
- Anti-phishing and anti-spam technologies
- Secure password management
- Automatic data back-up via Dropbox

SUPERIOR SECURITY FOR PC'S AND SERVERS

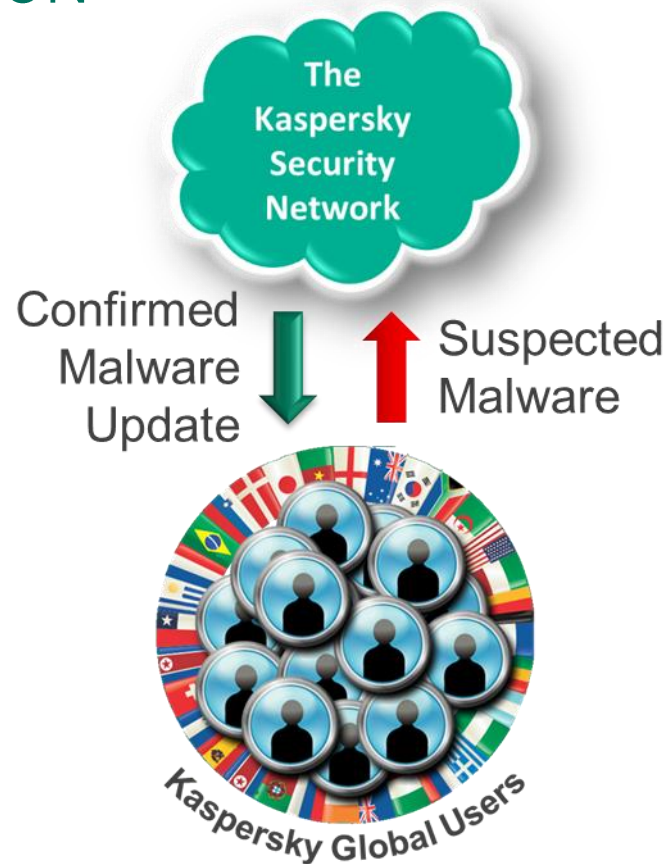

- Anti-Malware protection
- Data Protection
- Identity/Financial Protection
- Productivity Improvement
- Administrative Simplicity

ANTI-MALWARE PROTECTION

LEADING ANTI-MALWARE PROTECTION

- Combines:
 - Signature based protection to instantly block known malware
 - Heuristic technology spotting virus-like behaviors
 - The Kaspersky Security Network: cloud-assisted intelligence for up-to-the-second protection from new or unknown threats
- Firewall and Network Attack Blocker
- URL and File advisor

AUTOMATIC EXPLOIT PREVENTION

Going beyond vulnerability scanning

- Analyzes and controls the actions of programs, applications, etc. that have vulnerabilities.
- Prevents and blocks the actions of such programs and exploits by:
 - Controlling the launch of executable files from applications with vulnerabilities.
 - Analyzing the behavior of executable files for any similarities with malicious programs.
 - Restricting the actions allowed by applications with vulnerabilities.

DATA PROTECTION

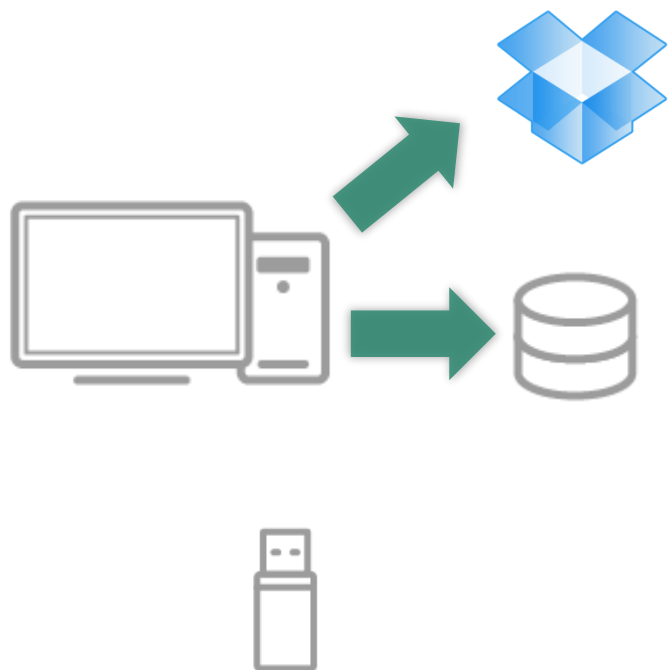

ENCRYPTED CONTAINERS

Complete protection for lost or stolen data

- Easily create containers – virtual ‘safes’ to store files and folders in an encrypted state
- Data in the container is only accessible by the owner of the data
- Protects valuable data from unauthorised access

BACKUP AND RESTORE

Storing and Recovering Data

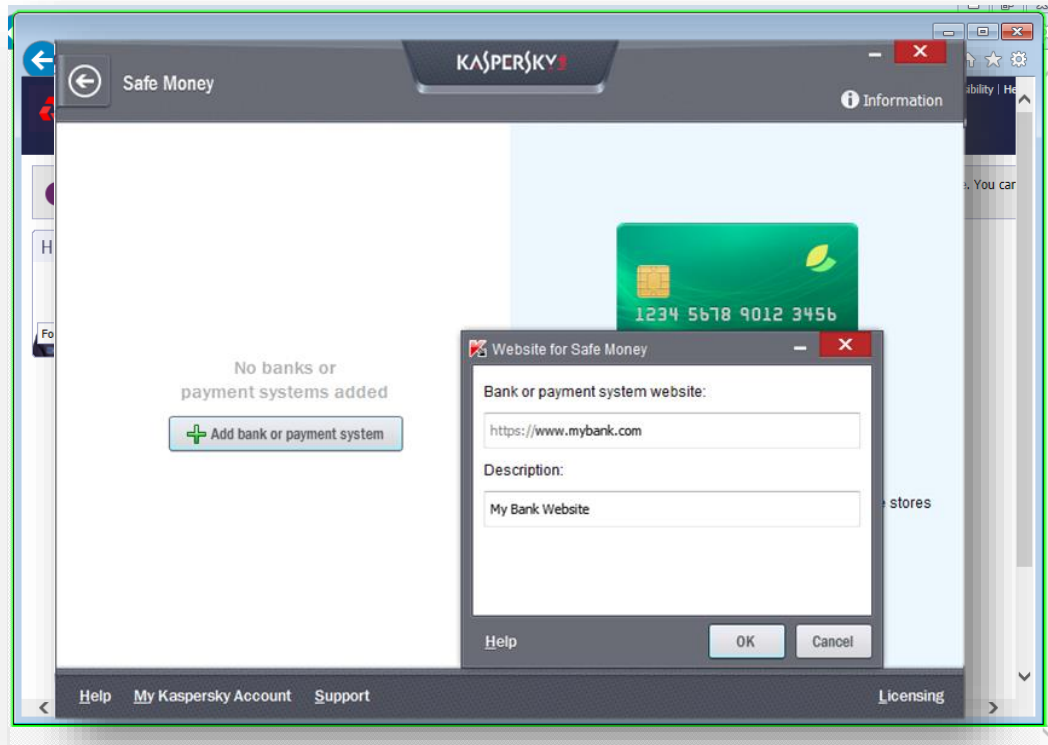

- Back up to local storage, FTP or cloud services
- Automate back-up process upon device insertion
- Integrated Dropbox support with 2gb extendable storage included*

*Subject to Dropbox terms and conditions

IDENTITY AND FINANCIAL PROTECTION

SAFE MONEY

Protecting your hard-earned money

Securing financial transactions

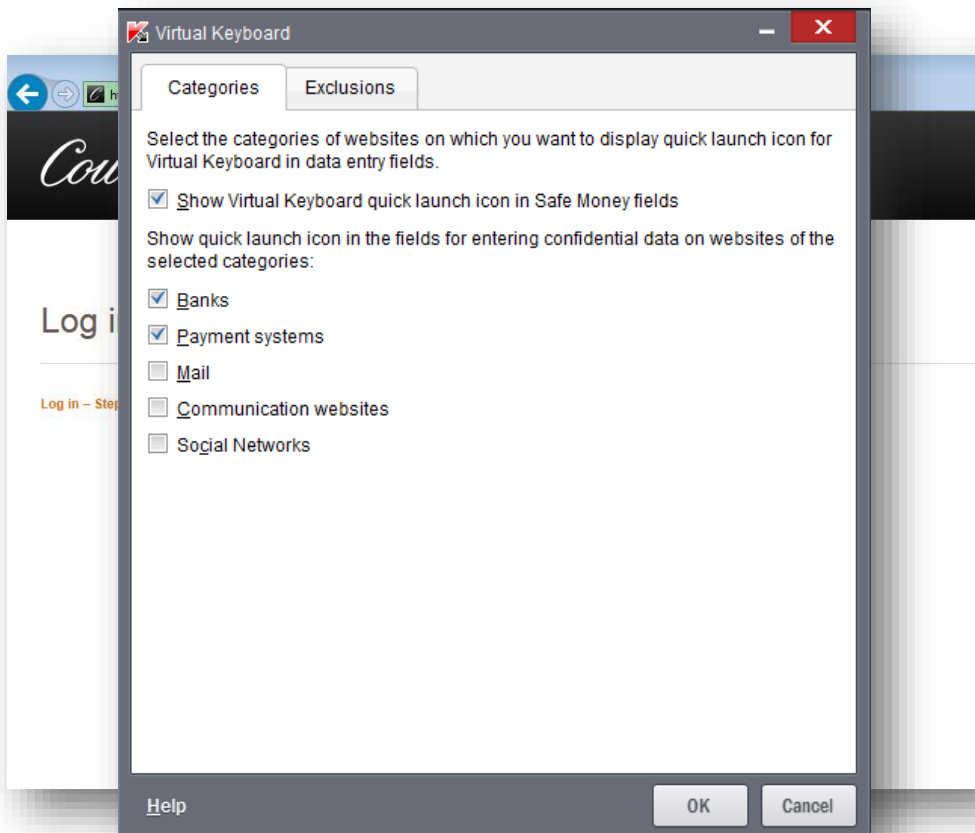

- Recognizes when a banking or payment site is being accessed, and offers Safe Money protection.
- Verifies that the site is genuine and secure.
- Protects data against unauthorized applications.
- Green frame readily identifies that Safe Money is active.

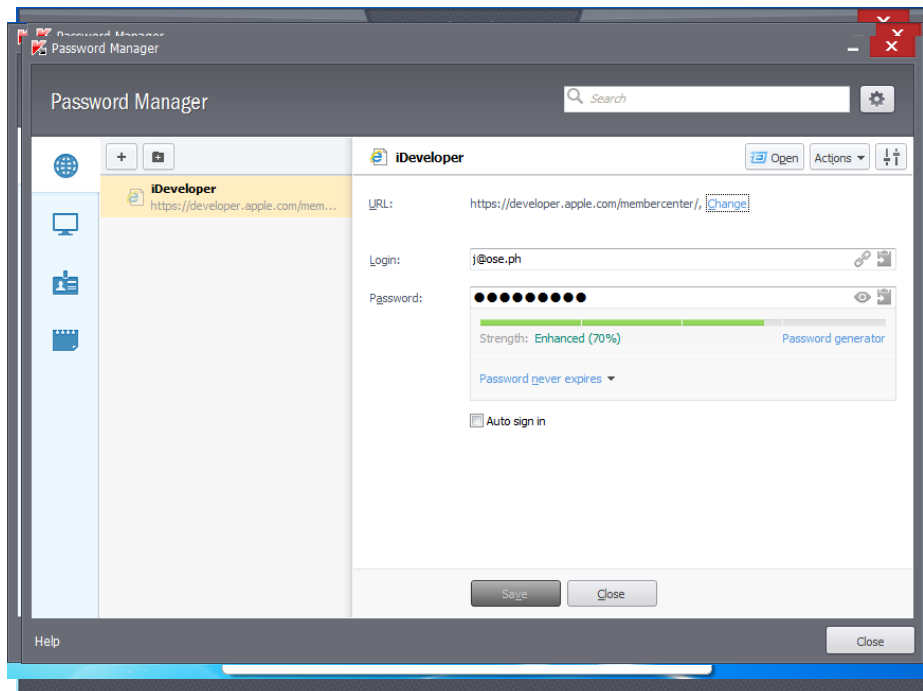

SECURE AND VIRTUAL KEYBOARDS

Preventing confidential data theft during input to financial sites.

- Virtual on-screen keyboard protects against programs that take snapshots or record keystrokes
- Activated automatically when using a banking or payment site
- Also: Secure Keyboard Mode provides enhanced protection for the physical keyboard connection

PASSWORD MANAGER

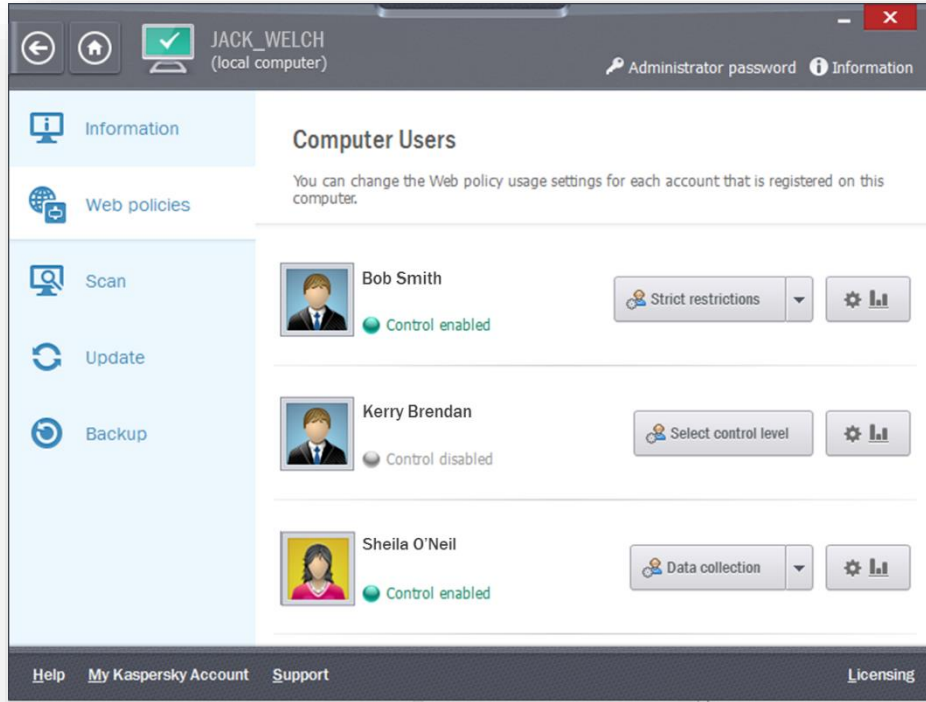

Make passwords easier and more secure

- Website and application passwords stored in a protected vault
- Includes a password generator and automatic sign-in feature
- Stores identify information to enable quick completion of web forms

PRODUCTIVITY IMPROVEMENT

WEB BROWSING POLICY CONTROL

Increase employee productivity and security

- Create and manage web usage policies for employees.
- Set times when web browsing is allowed or restricted.
- Ensure Safe Search controls are enabled to block prohibited content.
- Restrict file downloads

ADMINISTRATIVE SIMPLICITY

Easy to use, with no special training needed

OPTIMIZED FOR PERFORMANCE

Compatible with Windows 8 Workstations and Windows Servers

Workstations

Microsoft® Windows® 8 / 8 Pro (32-bit and 64-bit**)

Microsoft Windows 7 Home Premium / Professional / Ultimate - (32-bit and 64-bit**) SP 1 or higher

Microsoft Windows XP Home / Professional (32-bit) SP 3 or higher - Professional (64-bit) SP 2 or higher

Servers

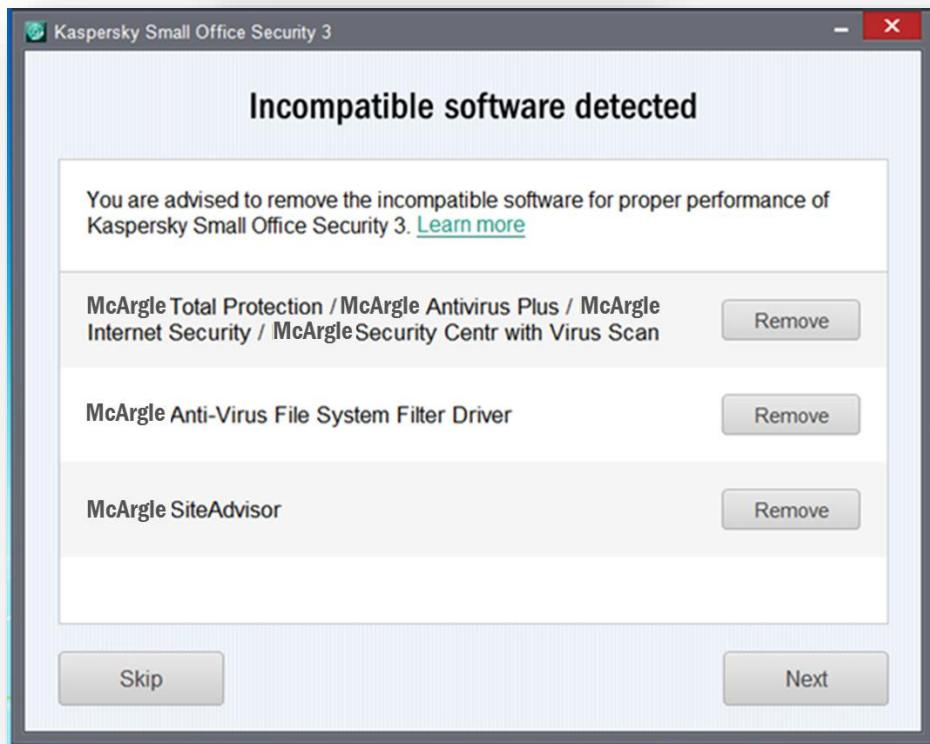

Microsoft Windows Server 2012
Foundation / Essentials / Standard

Microsoft Windows SBS 2011
Essentials, Standard SP 1 or higher

Microsoft Windows SBS 2008
Standard x64 Edition SP 2 or higher

Microsoft Windows Server 2008 R2
Foundation / Standard SP 1 or higher

INSTALLATION

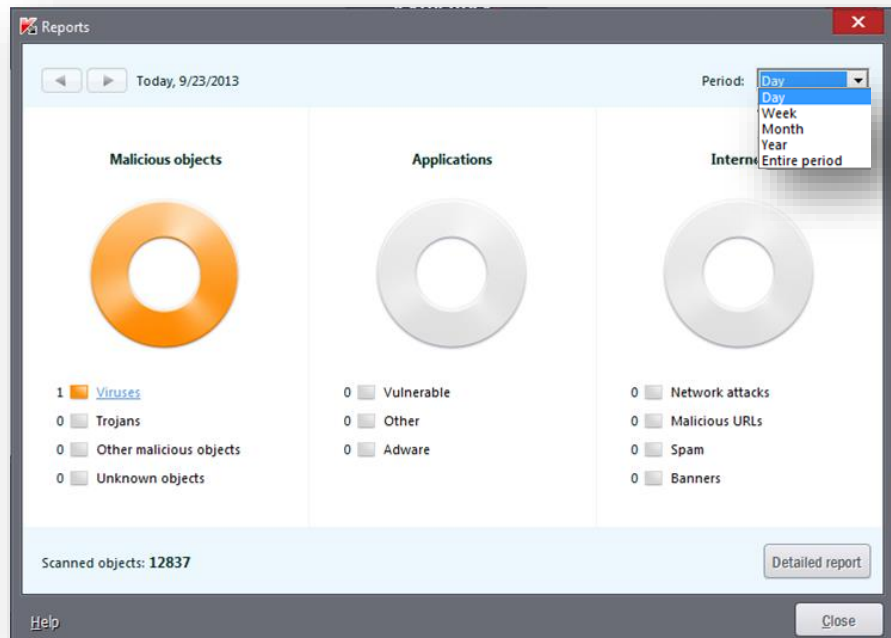

Simplicity, Step-by-step

- Purpose-built for busy professionals
- Easy to deploy through a simple installation process that anyone can use
- Helps uninstall existing antivirus
- Completes in minutes.

REPORTING

Quickly view security status

- Reports on all program activities
 - scans completed
 - malware found
 - sites blocked
 - updates
- Available at any time
- Variable reporting time frame

BONUS!

Kaspersky Small Office Security includes protection for Android devices!

MOBILE MALWARE IS ON THE RISE

ANDROID

99%

of all the mobile malware we detect every month is designed for Android

J2ME

0.97%

SYMBIAN

0.04%

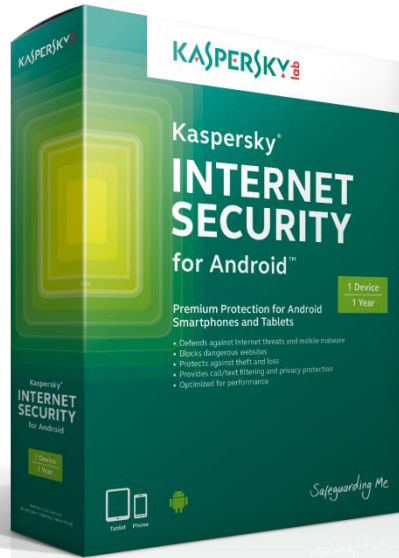

OTHERS

0.03%

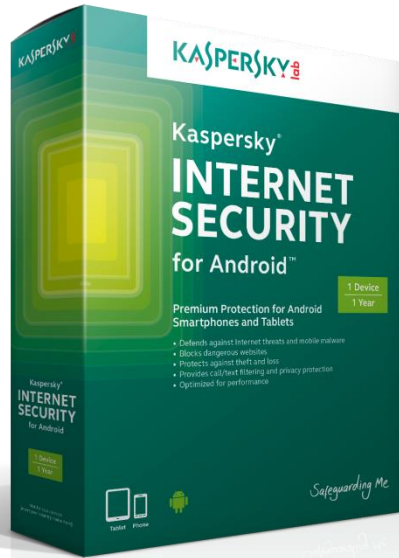

The evolution of mobile malware in 2012 was a predominantly Android-related affair, with malware writers largely concentrating their efforts on the little green robot. The number of mobile (and Android) malware in 2012 has grown exponentially. In June, 2012, alone, we have discovered more mobile malware pieces than in 2004-2011!

KASPERSKY INTERNET SECURITY FOR ANDROID

- ▶ *The latest, most comprehensive mobile security solution that won't interfere with your online activities or the performance of your devices*
 - Defends against internet threats and mobile malware
 - Blocks dangerous websites
 - Protects against theft and loss
